DETAILED ACTION

Specification

1. This application is informal in the arrangement of the specification. The following guidelines illustrate the preferred layout and content for patent applications. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

The following order or arrangement is preferred in framing the specification and, except for the reference to "Microfiche Appendix" and the drawings, each of the lettered items should appear in upper case, without underlining or bold type, as section headings. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) Title of the Invention.
- (b) Cross-References to Related Applications.
- © Statement Regarding Federally Sponsored Research or Development.
- (d) Reference to a "Microfiche Appendix" (see 37 CFR 1.96).
- (e) Background of the Invention.
 - 1. Field of the Invention.
 - 2. Description of the Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) Brief Summary of the Invention.
- (g) Brief Description of the Several Views of the Drawing(s).
- (h) Detailed Description of the Invention.
- (I) Claim or Claims (commencing on a separate sheet).
- (j) Abstract of the Disclosure (commencing on a separate sheet).
- (k) Drawings.
- (l) Sequence Listing (see 37 CFR 1.821-1.825).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Cyb (US 5,018,661).

Cyb teaches a method of manufacturing a combustion chamber comprises the joining of a plurality of cast wall sections (110, 112) by laser welding to form a combustion chamber (see Figure 6-8).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cyb (US 5,018,661) in view of Applicant's Admitted Prior Art (as set forth in lines 9-17 of page 1 and lines 1-18 of page 2 of the instant specification; hereinafter is referred to as AAPA).

As described above in paragraph # 3, Cyb teaches the claimed invention except for specifically mentioning that the wall sections are annular/circular segments and that the wall sections are made from a high-temperature nickel-base casting alloy.

Art Unit:

However, as clearly indicated in lines 9-17 of page 1 of the instant specification, Applicant admits that having and that the wall sections are made from a high-temperature nickel-base casting alloy are old and well known procedure in the art of manufacturing combustion chamber. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the method of Cyb so as to include the use of annular/circular/ring segmented and high-temperature nickel-base casting alloy wall sections, since Applicant has stated that such a procedure is well known in the art.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and are cited on form PTO-892 encloses herewith.

Official documents related to the instant application may be submitted to the Technology Center 3700 mail center by facsimile at (703) 305-3579/3580.
